

The employees of JSC “Vostokneftegazproekt” have practical operational experience in the scope of development of project documentation for development of oil-and-gas-condense fields situated on the territory of Russian Federation and union states.

Since 2009 our collective has accomplished more than 30 projects on development of oil, gas and gas-condense fields independently and in cooperation with overseas and national institutes. These projects underwent endorsement and confirmation with the corresponding state bodies of Russian Federation and other states.

The key specialists of the company are out-of-staff experts of the State Committee on Reserves of mineral resources. They take part in meetings and international conferences where they share operational experience with Russian and overseas colleagues and have scientific degree, that of Candidate of Technics.
